IKEJI JOSHUA

Ushafa, Bwari, Fedral Capital territory • +2349069970965 • ikejijoshua69@gmail.com

Frontend developer

Frontend developer with hands-on experience building responsive, user-focused web applications using React, Next.js, and Tailwind CSS. Skilled in integrating dynamic content using Supabase and MongoDB, and experienced in working with APIs, Git, and component-based architecture.

Currently interning as a frontend developer at Ogaticket and serving my NYSC at Usuma Dam Water Works in Abuja. My scientific background has strengthened my attention to detail, clear documentation, and problem-solving in structured environments. I bring a strong learning mindset and thrive in teams focused on clean design, usability, and real-world impact.

WORK EXPERIENCE

Ogaticket • **remote** • **01/2025 - Present**

Number one event ticketing platform.

Frontend Development Intern • **Internship**

Contribute to the design and development of user-facing features for a digital event ticketing platform using modern web technologies such as React, Next.js, and Tailwind CSS. Collaborate with cross-functional teams to improve the user interface, optimize performance, and ensure responsive design across devices.

Usuma Dam Water Works FCT • **FCT Abuja** • **01/2025 - Present**

Quality Control Laboratory Intern (NYSC Member) • **Internship**

Support laboratory operations in monitoring and ensuring the quality of treated water supplied to the public. Assist senior scientists in conducting chemical and microbiological tests, recording and analyzing data, and maintaining accurate documentation for regulatory compliance.

PROJECTS

Ecommerce Template with Paystack & Payload CMS

A dynamic ecommerce website template built with Next.js, integrated with Paystack for secure payments and powered by Payload CMS for flexible product and content management. Designed as part of a developing business model, this project supports inventory control, cart management, and responsive UI built with Tailwind CSS. It demonstrates seamless integration between frontend systems and a custom CMS, optimized for real-world scalability and Nigerian payment infrastructure.

Grilli Restaurant

A modern restaurant web concept built with Next.js and Tailwind CSS, designed to showcase a seamless dining experience. Features include a responsive landing page, interactive menu browsing, reservation call-to-action, and elegant animations to highlight brand identity. Focused on clean UI, mobile responsiveness, and performance optimization using server-side rendering and utility-first styling.
